Oracle COTS Applications Implementation USIT provides full life-cycle Oracle implementations. We also provide integration, upgrade and application administration services for Oracle's suite of COTS applications. USIT offers advanced SOA and Web services integration for customers leveraging Oracle's Application Integration Architecture. Our focus includes Oracle EBS, Financials, Supply Chain, CRM, HRMS, and Hyperion Planning and Budgeting. USIT also has significant experience in legacy and third party integration.

Enterprise Performance Management and Business Intelligence USIT has industry experts in Oracle's EPM and BI products to help customers optimize performance and promote real-time effective decision making. We provide analytics and integration services with the full suite of Oracle BI products.

Application Development Our Oracle experts are capable of providing departmental to enterprise-wide support for your development projects, incorporating today's richest development methods, data sharing protocols, and coding standards. We provide the full range of services, including extending Oracle COTS solutions and creating custom built applications.

Identity Management USIT's experts use Oracle's application-centric IdM suite to create enterprise-wide trusted authentication solutions. Through standard identity management, LDAP synchronization or federated authentication, we mitigate security risk and provide efficiencies for our customers.

Oracle Database Services Our DBAs are skilled in Oracle high availability, performance tuning, data warehousing, records management, clustering, security & compliance, and grid computing.

USIT's personnel, business units, and professional engagements provide timely, responsive support to our customers both remotely and on site.

USIT earned an overall **96%** customer satisfaction rating in Dun & Bradstreet's 2012 Open Ratings survey of existing customers, which surpassed our 2012 rating of 96%.

USIT holds a Top Secret Facility Clearance with TS and TS/SCI cleared professionals.

We consistently receive excellent ratings in the Department of Defense's Contractor Performance Assessment Reporting System (CPARS) and a 100% contract renewal rate.

As an Oracle Gold Partner, USIT's IT professionals average 8 years' experience across the Systems Development Lifecycle.

In 2013, USIT ranked among *The Washington Business Journal's* 50 Fastest Growing companies in the Washington, D.C. area for the second consecutive year.

USIT's Contract Vehicles

USIT's core capabilities and advanced technologies are readily available through a wide spectrum of contract vehicles. From government wide acquisition contracts (GWACs) to agency-specific blanket purchase orders (BPAs), our contract vehicles provide efficient access to our alumni knowledge base, Oracle-specialized skills, and technical resources to fulfill your short and long term needs.
